

The world's first all-in-one X-ray and ultrasound system

Digital Radiography

The Slate Hub is the **fastest** equine digital radiography solution on the market. Produce high quality diagnostic radiographs with innovative technology that makes taking, reviewing and optimising images easy.

Wireless ultrasound

With the **new** ultrasound probe, it is easy to switch between X-ray and ultrasound, using only one piece of imaging equipment. Perfect for initial scans in the field, you can switch to wireless ultrasound imaging quickly and save clips and stills to the patient's Slate Hub record.
